Monthly Drawings

Each month we have a drawing and randomly select one patient who has referred another patient and one patient who has had treatment completed.

This month's winners are
**Barbara Cmehil
And
Cathy Grayson**

We now offer invisible braces

ClearCorrect is the clear and simple way to straighten your teeth without wearing braces so you can still show off your smile. There are no wires or metal brackets. Your teeth are straightened with a series of clear, custom, removable aligners. Each aligner moves your teeth just a little bit at a time until you eventually get straight teeth.

Getting Started:

The doctor sends your records—impressions, photos, x-rays— and a prescription for your custom aligners to ClearCorrect and they use those records to form exact 3-D models of your teeth. Then working with the doctor and following the precise instructions provided on your prescription, ClearCorrect maps out a complete treatment plan of gradual adjustment that takes your teeth from where they are currently to where you and the doctor want them to end up. Once completed, you and the doctor will be able to preview the projected results of your treatment in your “treatment set-up,” a computer representation of your teeth before or after treatment.

When you and the doctor are satisfied with the projected results, ClearCorrect will create your custom aligners and then send the aligners to the doctor for delivery to you.

Progress Wearing Your Aligners:

You'll wear your aligners all of the time, except while eating and drinking or during daily tooth care, such as brushing and flossing. The ClearCorrect aligners are so clear they are barely noticeable so they won't have an impact on your day to day life. Aligner by Aligner, you'll be able to see the difference as your teeth slowly adjust and align to your target smile. You'll visit your doctor periodically for checkups to see how you're progressing until you eventually have the straight smile you have always wanted.

ClearCorrect aligners are easy to wear, make it easy to brush and floss, and easy to eat, all while being almost invisible. Ask us if you would like to know more about this great new advancement in dentistry.

You too, can get the obvious benefits and confidence you'll enjoy with straight teeth. ClearCorrect can make it easy to show off your smile!

Motherhood is the most lovely as well as proud feeling for any woman. There is little doubt that motherhood changes the entire world of the women. But motherhood itself changes every time a new baby is born. Here are certain ways, which can help you discover the truth in this fact. Check it out for yourself how having a second and third child differs from having the first one!

Your Clothes

First Baby:

You begin wearing maternity clothes as soon as your OB/GYN confirms your pregnancy.

Second Baby:

You wear your regular clothes for as long as possible.

Third Baby:

Your maternity clothes are your regular clothes.

The Baby's Name

First Baby:

You pore over baby-name books and practice pronouncing and writing combinations of all your favorites.

Second Baby:

Someone has to name his or her kid after your great-aunt Mavis, right? It might as well be you.

Third Baby:

You open a name book, close your eyes, and see where your finger falls. Bimaldo? Perfect!

Preparing for the Birth

First Baby:

You practice your breathing religiously.

Second Baby:

You don't bother practicing because you remember that last time, breathing didn't do a thing.

Third Baby:

You ask for an epidural in your 8th month.

The Lavette

First Baby:

You prewash your newborn's clothes, color-coordinate them, and fold them neatly in the baby's bureau.

Second Baby:

You check to make sure that the clothes are clean and discard only the ones with the darkest stains.

Third Baby:

Boys can wear pink, can't they?

Worries

First Baby:

At the sign of distress—a whimper, a frown— You pick up the baby.

Second Baby:

You pick the baby up when her wails threaten to wake your first born.

Third Baby:

You teach your 3-year-old how to wind the mechanical swing.

Activities

First Baby:

You take your infant to Baby Gymnastics, Baby Swing, and Baby Story Hour.

Second Baby:

You take your infant to Baby Gymnastics.

Third Baby:

You take your infant to the supermarket and the dry cleaner.

Going Out

First Baby:

The first time you leave your baby with a sitter, you call home 5 times.

Second Baby:

Just before you walk out the door, you remember to leave a number where you can be reached.

Third Baby:

You leave instructions for the sitter to call only if she sees blood.

At Home

First Baby:

You spend a good bit of every day just gazing at the baby.

Second Baby:

You spend a bit of every day watching to be sure your oldest child isn't squeezing, poking, or hitting the baby.

Third Baby:

You spend a little bit of every day hiding from the children.
